

Wyoming Stratigraphy Website *Call for Photos!*

The Wyoming State Geological Survey (WSGS) is requesting photos of various geologic formations throughout the state for its new stratigraphy website. Geologists (researchers and students) are encouraged to participate by taking photos while conducting their fieldwork.

Photos (JPEGs preferred) should be submitted to the WSGS (via Curtis.mccann@wyo.gov) along with the following information.

- Brief description of the basin and/or formation(s)
- Location (latitude/longitude with datum) as well as the cardinal direction the photo was taken
- Sentence on why it is interesting
- Name of photographer and affiliation

Example: Eocene-aged delta deposits in the Green River Formation, southeast of the ancient Lake Gossuite in the Green River Basin (44° 59' 45.33" N. 105° 11' 27.10" W., 6/15/2012, Fort Union Formation, Paleocene, Lance Formation, Cretaceous). *Photo by Nick Jones.*

WSGS Stratigraphy Website (log on for Call for Photos project):
<http://www.wsgs.uwyo.edu/research/stratigraphy/indexmap/>

Photos will be verified by a WSGS geologist and considered for website publishing. (Note: High-quality photos may also be considered for WSGS publications.) The photographer will receive full credit for the photo.
